PERFORMANCE FABRICS

100 years of experience.

A leader in technical sport fabrics with qualities such as UV Protection, Anti-Microbial, Stain Release and Moisture Wicking. These are manufactured at mills that have been accredited by leading textile organizations. Our ability to provide technical fabrics that solve specific issues has made us the preferred supplier to major sport teams around the country.

We are proud to present the comprehensive KAPPA4TEAM fabric range.

FABRICS PROTECTION & FITTING STYLES

SKIN FIT | SLIM FIT | REGULAR FIT

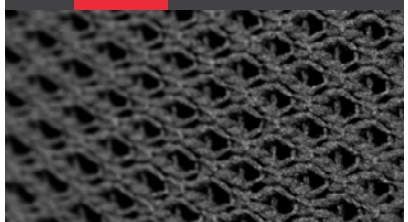
CLIMA PROTECTION

Kappa's Clima Protection has been designed using hi-tech fabrics to help keep the body at a constant temperature during climate and thermal changes.

CLIMA PROTECTION

BACTERIAL PROTECTION

Our Bacterial Protection fabric has been engineered and treated especially to create a protective barrier against bacterial growth and to prevent odour.



BACTERIAL PROTECTION

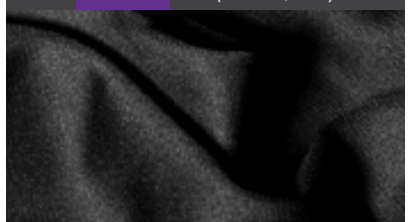
HYDRO-WAY PROTECTION

Hydro-way performance fabric includes our high performance fabric **Quick Dry**, which has been engineered to draw heat away from the skin and keep the body cool and dry.

HYDRO-WAY PROTECTION

UVA PROTECTION

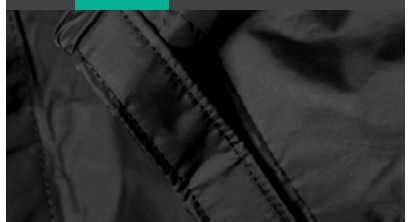
Items with UVA Protection offer a high level of protection against the harmful effects of UVA rays. Our hi-tech fabrics together with careful details ensure the best performance and protection, always.



UVA PROTECTION

WIND PROTECTION

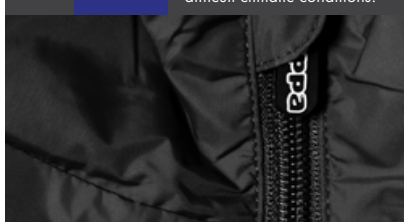
This structure is a combination of Kappa's hi-tech fabrics to give you a full windproof performance, ensuring a perfect transpiring action.



WIND PROTECTION

WATER PROTECTION

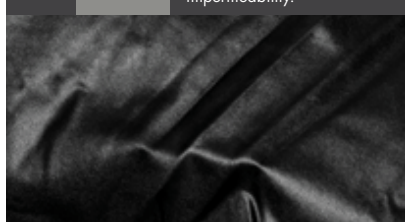
Water Protection fabric is made with a combination of highly water-resistant and water-repellent fabrics which guarantee an excellent performance even during difficult climatic conditions.



WATER PROTECTION

WATER PROOF PROTECTION

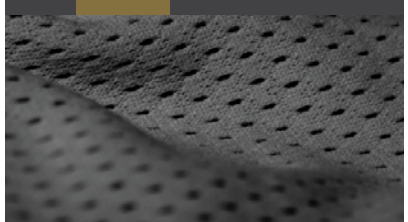
Item's with Water Protection have been constructed to be a shield against water. The fabrics are totally water proof with heat sealed seams to ensure an absolute impermeability.



WATERPROOF PROTECTION

BREATHEABILITY PROTECTION

Our Breathability Protection fabric has been engineered to grant maximum breath-ability, as it allows air to pass through so perspiration can easily evaporate.



BREATHABILITY PROTECTION

ANTI MICROBIAL

CleanCool Anti-Microbial fabric eliminates highly tolerant MRSA in a short time which maintains freshness in garments by eliminating bacteria the causes odour. *Available on custom orders only

CUSTOM SUBLIMATION

Sublimation is a unique process designed to provide you with the freedom and ability to create unique on-field garments for your club or team.

Kappa Australia utilises the highest quality performance fabrics with our dedicated in-house designer available to assist with tailoring your designs.

Look great and feel amazing with KAPPA4TEAM customised sublimation.

SOME OF THE PROUDLY PARTNERING CLUBS ACROSS AUSTRALIA

CLUB TESTIMONIALS

"To Zevi and the team at Kappa Australia,

I am so happy after the delivery of our new Team Kappa training gear. The reaction from our players and staff both in terms of quality and delivery time has been overwhelming. This on top of the sample playing shirts that our fans have gone crazy for. We cannot wait to get them into retail.

We are fortunate as a new A-League Club to have secured Kappa as our apparel partner. The production of our kit has exceeded our expectations.

Given Western United Football Club was only granted an A-League license in December 2018 and that Kappa Australia only won the tender process in March 2019, the speed with which you have attended to our needs and met our tight delivery deadlines has been amazing. Having been in the sports industry for 30 years and have worked with many of the biggest international brands in sport, I can sincerely say that no one else could have done what you have done for WUFC.

Kappa Australia has provided WUFC a complete quality package from design to production to strong and valuable advice on how to take our range to market.

I have no hesitation in recommending Kappa Australia to any sporting organisation for their apparel needs. However, not too many in Melbourne, as I am selfish and want all the great exposure for my club."

Lou Sticca, Director Western United Football Club

CLUB TESTIMONIALS

"The Kappa range of stock products has been a huge positive for our club over the last two seasons. With a recent urgent request for additional training kits, polos and bags the team at Kappa were able to quickly and efficiently deliver with our orders in full.

From Miniroos through to our Senior NPL teams the FC Bulleen Lions players have had nothing but positive feedback on the quality, style and durability of the Kappa stock range."

David Del Monaco, General Manager FC Bulleen Lions

"Kappa Australia supplied our football team's playing strips for the Kanga Cup. They provided excellent service, assisting us with the design of the jerseys and ensuring that the goods were delivered on time.

Communication was always prompt and reliable and I would not hesitate to recommend Kappa Australia to any sporting club."

T. Di giacomo Townsville Warriors

"I have only been dealing with Jake and the Kappa team for a short amount of time, and during that time I have found them very helpful and easy to work with. They have done a great deal of work in setting up all of our clubs apparel and the quality of the product is the best we have ever been supplied with at this club.

I would highly recommend talking to Jake and the team at Kappa if you are looking for a quality product with quality service"

Brad Lloyd, President Kawana Force

"Our orders have always been completed on time with 100% accuracy and their despatch process is excellent which makes unpacking and sorting the apparel a breeze.

Working with State Teams does not allow any great length of time for our apparel to be manufactured and delivered, however Kappa Australia have always delivered on time which allows Football Queensland to meet tournament deadlines."

Wendy Acton, Competition Administrator Football Queensland

"Lions FC switched to Kappa on short notice due to a failure from another company and it has been the best decision we have made as a club. From the owner down to the local contacts they have been nothing but professional, accommodating and service driven. In the apparel industry it is known for empty promises but the team at Kappa always seem to deliver.

The biggest asset has been the design team that has helped reinvigorate our brand with our gear looking first class on and off the pitch. The design team has put forward many ideas to help us stand out from the crowd, and the quality of workmanship of the garments makes the product look the part. The players love the training gear through to the playing gear and off-field apparel.

I would highly recommend Kappa to any club looking for a quality product with a quality service to back it up."

Rob Scanlon, General Manager Lions FC

ANTI-MICROBIAL FABRIC

CLEANCOOL
ANTI-MICROBIAL FABRIC

With [Ag+] contained in the fibre, CleanCool Anti-Microbial fabric eliminates highly tolerant MRSA as well as Staphyococcus and Pheumococcus in a short time which maintains freshness in garments by eliminating bacteria the causes odour.

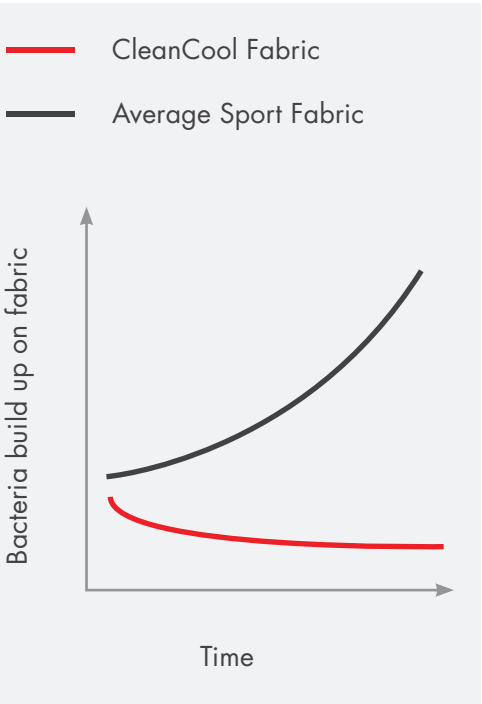
Over time people have experimented using the material in cutlery and jewellery as we all know.

Realising its safety on the human body, technicians have developed a new fabric containing Silver fibres making the fabric different to any other chemical finish.

The anti-bacterial effect from this fabric is extremely durable.

Our anti-microbial fabric items can be purchased through custom orders only.

ANTI-MICROBIAL FABRIC



A critical compartment for any clothing system is the next-to-skin layer, which must provide the basis of a sweat management system. Our CleanCool fabric does that, and more. Developed by Sinotextiles Corporation Ltd., CleanCool combines the softness of cotton and the cool, easy care properties of polyester to keep you fresh and cool at all times.

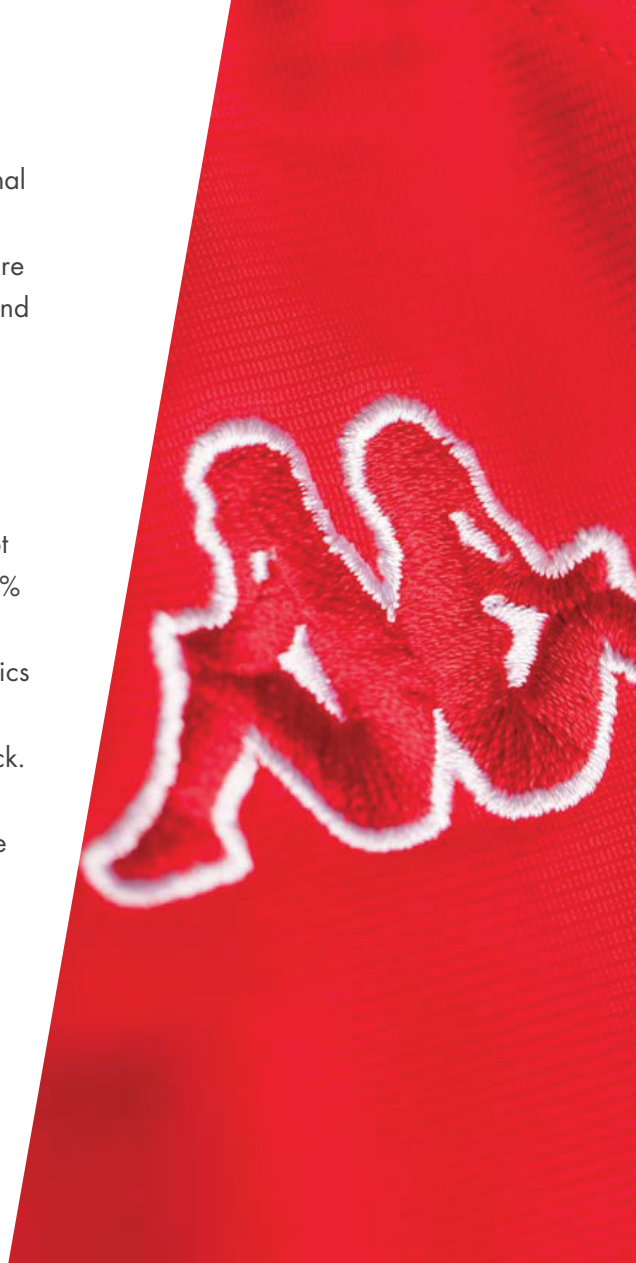
With its anti-microbial effect, CleanCool also protects the human body from harmful germs.

The secret of CleanCool is in its multi-channel cross section, special textile design and unique finishing. It applies to the capillarity theory of textile development, moving moisture away from the outer layer of the fabric. It then dries that moisture faster than any other fabric and thermo-regulates the body.

Despite its relatively hydrophobic basis, the integral surface channels and the resulting greater surface area of CleanCool, provide a greater ability to transport moisture along the surface of the fibre.

The irregular network of fibres create numerous contact points, giving rise to capillarity action, which is important for the transport of liquid moisture. These multi-fibre contact points do not occur with traditional round fibres because of their geometry. These characteristics of CleanCool ensure that perspiration does not accumulate and quickly reaches the surface, where it is released to the surrounding air helping the skin to stay drier, for longer.

Although CleanCool fabrics move moisture quickly, individual fibres do not absorb moisture readily. In fact about 1% by weight compared with over 10% for cotton fibres. This helps CleanCool fabrics to dry quickly and reduce the potential for odour, bateriological or mildew attack. Additionally, with its anti-microbial component, [Ag+] contained in the fibre CleanCool eliminates various harmful and odour causing germs.



KAPPA4TEAM
OFF-FIELD

Kappa Australia produces a comprehensive range of off-field and spectator apparel including jackets, polos, tracksuits, wet and cold weather kit.
