## ACKNOWLEDGEMENT

Football Queensland would like to acknowledge the work, support and guidance provided by Felton Industries in the development of this Shelter & Grandstands Facility Guide.

This Guide has been developed to assist Local Council Authorities, consultants, building designers, developers, clubs, and zones to plan and deliver successful shelter and grandstand projects.

**DISCLAIMER:** This Guide has been developed to provide general guidance to local Council, clubs, and associations in Queensland to assist them with shelter and grandstand projects. The contents of this Guide should not be used for any other purpose or reproduced or communicated without the consent of Football Queensland. Football Queensland makes no representation or warranty about the accuracy or completeness of the information contained in the Guide. You should not rely solely on the information in this Guide and should make independent inquiries, including seeking professional advice. To the extent permitted by law, Football Queensland disclaims any responsibility and liability for any cost, expense, loss or damage incurred by any entity or person relying on the information contained in this Guide.

VERSION: 2023v1

# INTRODUCTION

**Sporting facilities are typically wide-open spaces with minimal consideration for spectator or player shade protection or seating. Regardless of the size or location of the facility, shade and seating for players, officials and spectators is essential as participation in football events can be for considerable amounts of time.**

Football Queensland has created this Shelters, Seating & Grandstands Facility Guide to provide information, recommendations and solutions for clubs and local councils to install shelters and suitable seating at sporting facilities.

Sporting facilities that provide shelter and spectator seating are more likely to see an increase in crowd support which may increase canteen spending and member registrations.

# SHELTERS, BENCH SEATING & GRANDSTANDS

The Queensland Department of Health provides guidelines for the recommended provision of shade and grandstands for sporting fields.

Considerations from the guidelines state:

- There is a requirement for 100% shade protection for players when they are off the field if possible.
- Shade should not hinder spectator view.
- Grandstands should face south if possible.
- Additional design features can improve the shade protection for grandstands e.g., installation of adjustable screening hung vertically from the front of the grandstand roof and the side screening particularly on the northern and western sides.
- Provision of multilingual signs highlighting:
  - The daily UV indexes.
  - The five sun protection behaviours
  - Locations where shade is provided at this facility.

More guidance can be found [here](#) on the QLD Health website.

## Quality & Effective Structures

Correctly positioned and well-designed shelters and grandstands can provide protection from UV radiation all year round for players and spectators.

Well-designed shelters should:

- Provide a barrier that protects users from direct and indirect sources of UV radiation.
- Provide shade that is practical, attractive, and environmentally friendly.
- Ensure the outdoor space is comfortable to use in all seasons.
- The structure considers air temperature, humidity, air movement and heat radiated from the sun and surroundings.

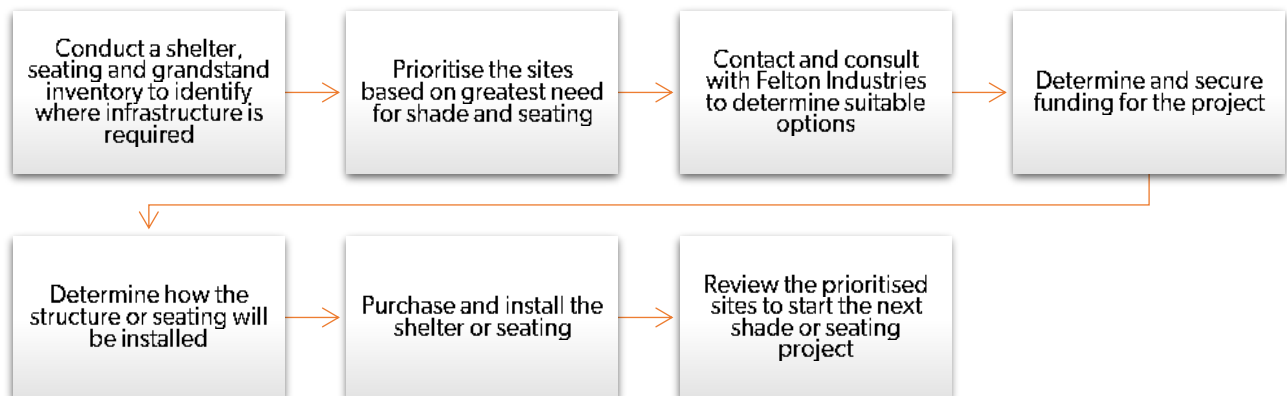

Well-designed grandstands should:

- Require little maintenance.
- Designed for the Queensland environment including:
  - Cyclone rating for Northern regions.
  - Will not rust or fade when left in exposed locations.
- Be portable if unable to be permanently secured.
- Be fully enclosed between tiers for safety.
- Include safety and security measures e.g., mesh safety surround for multi-tiered grandstands.

# Project Considerations & Checklist

## Conducting a Shelter, Seating & Grandstand Inventory

Assess your facility and identify areas where large amounts of activity take place particularly where people congregate. This usually includes areas close to a canteen, spectator viewing points and off-field areas near dugouts.

## Prioritising Shelter & Grandstand Sites

Using the shade inventory list, assess each area using these criteria:

- Time of Use
  - Particularly between 11am and 3pm when UV radiation levels are generally the highest.
- Duration of Use
  - The longer the exposure to UV radiation, the greater the risk of harm.
- Level of Use
  - High use areas should take priority over sites that are used less often.

## Contact FQ's Shelter, Seating & Grandstand Expert

Football Queensland's preferred supplier for shelters, seating and grandstands is Felton Industries.

Felton Industries have been working with a wide range of sports clubs state-wide to supply their spectator seating including grandstands and shade shelters. Their outdoor furniture is certified as Australian made and is of the highest quality and safety.

**Contact Felton on 1800 83 40 16, email [sales@felton.net.au](mailto:sales@felton.net.au) or visit the website <https://felton.net.au/>**

## Conducting a Shelter & Grandstand Audit

A shelter, seating and grandstand audit has five steps:

1. Determine the usage patterns of the site.
2. Determine the amount of useability of existing shade and seating at the site.
3. Consider the effects of reflected UV radiation.
4. Assess the need for improved or increased shade and seating at the site.
5. Identify possible options to improve shade and seating at the site.

## Planning & Implementing

Post completing the audit, the final steps in completing the project include planning, implementing, managing, and evaluating.

These steps should be done in consultation with a shelter, seating and grandstand structure specialist who will assist the club in:

- Forming a project team to develop the project.
- Draw up a detailed site plan.
- Provide suitable shelter, seating and grandstand options for the selected site/s
- Quote on suitable product options (to include installation and project management
  - Includes preparing a design brief to assist in securing funding.
- Identify what permits, approvals and documentation is required.
  - Consultation with building and planning departments of local council is required to ensure project approval.
- Determine any external constraints e.g. heritage issues, environmental impact considerations
- Develop a timeline for the project.

## Funding & Financial Support

A variety of funding opportunities exist for sporting clubs to purchase infrastructure. View open and relevant funding programs [here](#).

Financing is also available for sporting clubs through Felton's finance partner Finlease. Clubs can apply for finance [here](#) and download an infographic highlighting ten good reasons to consider financing.

Eligible sporting clubs can also claim an immediate deduction for the business portion of the cost of an asset in the year the asset is first used or installed ready for use. Suitable assets include shelters and grandstands. Visit the [Australian Taxation Office webpage](#) for more information on the program.

## Use Advertising on Outdoor Furniture to Generate Revenue

If your sports club is really keen on purchasing new bench seating or grandstand but you are not sure if you can afford it and are considering grants and other revenue generating schemes to help pay for the seating. Don't look past advertising on your outdoor furniture which can bring in steady streams of revenue to help cover the cost of the initial outlay. A quick video and how to guide on advertising on your bench seating or grandstand can be accessed from [here](#).

By successfully advertising on your bench seating or grandstand and by engaging supportive sponsors, a sports club can bring in regular revenue to help with the costs of running the organisation.

If you are interested in finding out more about advertising or about our range of outdoor furniture and contact the team at Felton today on 1800 834 016 for advice or a quote.

## PRODUCT RECOMMENDATIONS

### Sunsafe Select Grandstand

**\$17,696.00 ex. GST**

**Product Code: SELG4T4R**

A structurally engineered all-in-one unit that provides shade and shelter for up to 40 people.

- Structurally engineered all-in-one roof
- Footrests & backrests with extra safety support bar
- Built to last durable fabricated aluminium frame
- Cyclone Rated Category C
- Coloured Safety End Caps available in red, blue, green, purple, yellow and orange.

Roof Coverage: 5160mm W x 3552mm D  
Seating Plan: 2253mm W x 4016mm D x 1040mm H (4th Tier)  
Overall Plan: 5160mm L x 2499mm H (4 Tier) x 3552mm D

### 6x3 Aluminium Skillion Shelter

**\$10,850.00 ex. GST**

**Product Code: FELASS63**

The Aluminium Skillion Shelter features an architectural louvre screen and 6m Colorbond Roof providing an extensive 18 square metres of shaded shelter.

- 6mtr x 3mtr Aluminium Skillion Shelter
- Full Aluminium Frame Construction
- 7.6 Degree Skillion Roof Design
- Aluminium strip Louvre Screen included on 1 x 6mtr side as standard
- Engineered for Wind Region C Terrain Category 2.5
- Bolt Down Footing Design Only
- Colorbond® Iron Roofing Material – Deep Ocean Standard with Alternative Colour Options Available
- Dulux Powder Coating Colour Range Available

Overall Dimensions: 6042mm Long x 3073mm Wide x 2920mm High (at highest point)
