

MEMO 17 - 25

To: NPL Queensland, FQPL 1 and FQPL 2 Clubs
From: Football Queensland
Subject: FQ Live Stream VEO Camera Placement Compliance
Date: April 24, 2025

Dear Clubs,

As Football Queensland continues to enhance the professionalism and visibility of our Advanced Leagues, we remind all clubs of the requirement of correct Veo/analysis camera placement during live streamed matches, following continued instances of unacceptable setup.

For all fixtures that are live streamed by Football Queensland or Football Australia, Veo/analysis cameras **must not** be placed in a position that obstructs the view of the broadcast camera in any way. Whenever possible, these cameras should be positioned on the **opposite side of the pitch to the broadcast camera**.

Despite recent communications, we have continued to see breaches of this requirement, including towers and tripods being erected in front of broadcast cameras, which is unacceptable and compromises the quality of the stream.

All clubs are asked to ensure this message is clearly communicated to and actioned by the relevant staff and technical personnel responsible for matchday setup moving forward.

We appreciate your immediate attention to this matter and your cooperation in maintaining the quality and integrity of our broadcasts, ensuring a smooth experience for all clubs, participants, and viewers.

For any further enquiries, please contact Football Queensland via competitions@footballqueensland.com.au

End.
